

Clinical Research Fellow

- We are looking for a motivated, committed clinical and translational researcher who works well with others and whose long term goals are to join a profession in medicine.
- **Interested candidates should email Kelly Knoblauch Kelly.knoblauch@jefferson.edu** and meet Dr. Neda Nikbakht for an in-person interview on campus at Thomas Jefferson University. The full-time job commitment would be from July 2018 until next June 2019 and ranging from 8 to 5 or 9 to 5 M-F.
- This is a paid fellowship position and international applicants should have appropriate work permits in order to be compensated.
- The clinical research fellowship at Jefferson Dermatology offers an immersive clinical and academic experience to students with a special interest in Dermatology. The fellow works closely with the academic clinicians at Jefferson dermatology and is responsible for planning and implementing investigator initiated and sponsored clinical trials in addition to writing research protocols, grants and IRB paper work. The fellow will have an opportunity to participate in translational laboratory research relevant to the ongoing clinical projects.
- The fellowship is also heavily centered on working one-on-one with patients in order to gather project-specific data, offering a special opportunity for the fellow to develop his/her interpersonal and communication skills.
- The candidate should provide 2 letters of reference (can be sent via email to Kelly.knoblauch@jefferson.edu)
